

TransPerfect's GlobalLearn LMS

TRANSFORMING STUDY TEAM TRAINING

GlobalLearn is a compliance-centric learning management system that ensures a seamless connection between your clinical trial training program and your eTMF. Our smart solution makes the management of study team training simple, archives the completed training certificates to the eTMF, and handles study personnel changes during the trial to ensure your inspection readiness.

Interactive Dashboard:

Monitor site training performance effortlessly with an easy-to-understand dashboard, offering insights into required course completion, amendment re-training, and protocol deviation follow ups.

Delegated Task Assignment:

Define roles and responsibilities, assigning appropriate training requirements to study team personnel based on their specific duties.

Classroom Training Management:

Oversee in-person training registration and attendance directly within the LMS, reducing the complexity of classroom training registration and dependence on wet-ink attendance logs.

Manage Certificates Module:

Centralize all issued training certificates in one place and automatically transfer them to your eTMF.

Virtual Training:

Leverage a Virtual Training module to handle remote classrooms and seamlessly incorporate session recordings into your Training Plans.

Eliminate Compliance Risks:

Safeguard your clinical study compliance with comprehensive training and meticulous documented evidence.

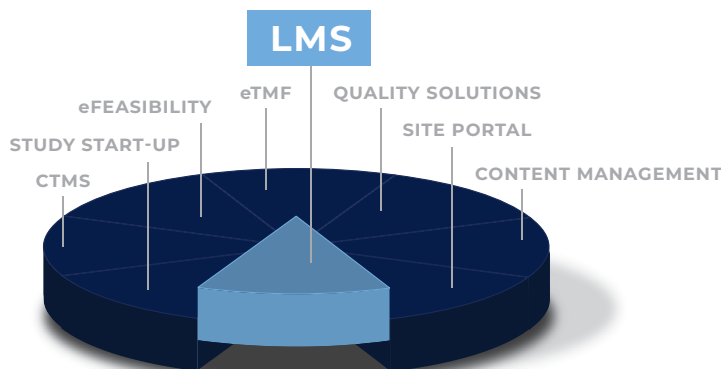

Improve Training Oversight:

Enhance your control over the study team training processes for superior trial management.

Reduce Training Costs:

Achieve improved efficiency and operational excellence by cutting down unnecessary training and travel expenses.

**ONE VENDOR.
ONE SYSTEM.
MODULAR SOLUTIONS.**

GlobalLearn: The most configurable and adaptable learning management system.
